

# rebate opportunities

## RESIDENTIAL

Residential, single-family homes that achieve at least 15 percent projected energy savings are eligible to receive an EnergyWorks KC rebate of project costs up to \$1,000.

The homeowner must complete a home energy analysis prior to selecting improvements and a post-improvements analysis to verify work has been completed properly.

The following EnergyWorks KC rebate requirements must be met:

- The physical address of the property must be in Kansas City, Mo.
- The rebate is valid only when energy savings of 15 percent or more is projected in your energy analysis.
- Health and safety concerns must be corrected before energy efficiency measures can be applied.

An EnergyWorks KC rebate can be combined with other rebates currently offered.

Act now  
as resources  
are limited!
